5. Savage-Rumbaugh has spent much of her career to investigate the cognitive and linguistic abilities of common chimpanzees and bonobos. Her research has shown that these animals are adept at picking up language and other types of behaviors generally considered to require a high degree of intelligence.
- A
B
C
D
6. Astronauts go through countless hours of training for spacewalks to familiarize themselves with the route they will take after leaving the airlock. Spacesuits are also directly tethered to the space station.
- A
B
- Give the unpredictable risks of space missions, how do astronauts train to deal with the feeling of fear.
- C
D
7. Agriculture is among the greatest contributors to global warming, emitting much greenhouse gases than all our cars, trucks, trains, and airplanes combined—largely from methane released by cattle and rice farms, nitrous oxide from fertilized fields, and carbon dioxide from the cutting of rain forests to grow crops or raise livestock.
- A B
C
D
8. For weeks, I had been traveling through some of the best tiger habitats in Asia, from remote forests to tropical woodlands and, on a previous trip, to mangrove swamps—but never before I had seen a tiger. Partly this was because of the animal’s legendarily secretive nature.
- A B
C
D
9. Crops and livestock tend to spread very more slowly from north to south than from east to west because different latitudes require adaptation to different climates.
- A B C
D
10. What makes Singapore the place that it is today? Its geographical location, its lack natural resources and its recent immigration history have all played a part in shaping this small island nation.
- A B C
D
11. Not as a subway system, which requires a concentrated urban population to make it profitable, a Bus Rapid Transit works best in less densely populated suburban areas.
- A B C
D
