

東吳大學 108 學年度暑假轉學生招生考試試題

第1頁，共1頁

系級	英文學系三年級	考試時間	100 分鐘
科目	英文寫作	本科總分	100 分

1. Read the following news report and write an essay to discuss whether you agree that universities should hire non-smoking staff only. (50%)

A university in Japan has said it will no longer hire teachers who smoke. Nagasaki University said it wants to create a healthier environment for its workers and students. The university's president Shigeru Kono said: "Our job as a university is to look after our staff. We feel we have to discourage them from smoking." Many companies have also started not recruiting smokers. Mr Kono said there would be a ban on smoking anywhere in the university by teaching and other staff from August. In addition, staff and students will be banned from taking cigarettes and lighters into any areas of the university from April 2020. Approximately eight per cent of the university's professors and teachers are smokers.

The no-smoking policy taken by Nagasaki University is part of a growing trend in Japan to ban smoking in public spaces. There are currently bans in many public places, including restaurants and bars, in the lead-up to the 2020 Tokyo Olympics and Paralympics. There are many areas of Tokyo and Kyoto in which people cannot smoke on the streets. The number of people in Japan who smoke is on the decline. In 1966, 49 per cent of adults smoked, including 84 per cent of men. Last year, 18 per cent of adults smoked, including 28 per cent of men. One company in Japan is trying to get its staff to quit smoking by offering extra days off to employees who did not smoke. Several staff members soon quit the habit.

2. Read the following news report and write an essay to discuss whether you would like to be an early bird or a night owl. (50%)

The phrase, "The early bird catches the worm" may be true. It means people who wake up early get more done than people who don't. Another saying is from Benjamin Franklin. He said: "Early to bed, early to rise makes a man healthy, wealthy, and wise." Scientists have found that people who go to bed before 11pm may do better in life than people who sleep around 2:30am. The researchers are from Birmingham's Centre for Human Brain Health in the U.K. Their research showed that people who slept and rose early (early birds) had an advantage over people who slept and woke up late (night owls). There were differences in the brain function of early birds and night owls.

The scientists tested 38 people in their research. The people answered questionnaires about their sleeping pattern and when they felt tired during the day. They were then put into an early bird or night owl group based on their answers. All of the people had MRI scans on their brain and did different tests throughout the day. The early birds said they felt less sleepy and were able to do the tests quicker than the night owls. The researchers said there were big differences between the two groups. The researchers said: "Night owls during school have to get up earlier, then they go into work and they have to get up earlier, so they're constantly having to fight against their preferences and natural rhythms."

【考生不可於文中書寫個人姓名或任何足以識別身分之文字或符號】
